How to make the invisible, visible

A wide-angle photograph of a coastal landscape. In the foreground, dark, choppy waves break onto a sandy beach. To the right, a dense field of tall, yellowish-green grasses, likely dune grass, sways in the wind. In the background, a long line of modern apartment buildings stretches along the coastline under a heavy, overcast sky.

What makes
Ocean communication
special & unique

Angler Recording Project

The Shark Trust

ENGLISH
DUTCH

Starting from 2010, the shark trust systematically asked UK based anglers to record all sharks, skates and rays they catch. In time, the information collated by the project will increase the understanding of inshore shark, skate and ray populations throughout the UK, feeding into the development of more effective management and, where necessary, protection. The shark trust has produced a shark, skate and ray identification guide, as well as a pocket guide and CD-ROM – and a wide range of additional leaflets and posters. Anglers can record their catch using an online recording form.

Basking Shark Watch

The Shark Trust

ENGLISH
DUTCH

The Basking Shark Project is a programme where citizens can report their sightings and photographs of basking sharks and hence contribute to the basking shark conservation. The shark trust runs both a sightings database and a photo-ID database which store information about these vulnerable species. The website contains a lot of information, an identification guide, a code of conduct on how to approach basking sharks, a handbook, a database of the records, distribution maps of the records since 2004 and a form to submit a sighting.

BeachWatch

Marine Conservation Society (MCS)

ENGLISH
DUTCH

BeachWatch organises beach cleanup days, where thousands of volunteers get involved in the most influential fight against marine litter in the UK. As a volunteer, you can either join an existing BeachWatch cleanup activity or organise one in your coastal neighbourhood yourself. Every year, BeachWatch compiles an annual litter report, based on data collected from all the BeachWatch activities. This report is then used as a backup for talks with companies, water companies, decision makers and leaders.

Хочите участвовать в очистке пляжей? Тогда BeachWatch - это для вас! Вся информация о том, как стать волонтером, а также о том, как организовать собственную очистку пляжа, вы можете найти на нашем сайте. Наши волонтеры регулярно проводят очистки пляжей в Великобритании и Ирландии, собирая мусор и проводя различные акции по защите окружающей среды. BeachWatch организует регулярные встречи с местными жителями и лидерами, чтобы обсудить проблемы, связанные с морской экологией и береговыми зонами.

1. Know your Audience (‘CLIENT principle)

“The more related to the sea, the better the knowledge”

(Belgium, 1250 senior people/students; Hoeberigs 2005)

2. Understand Environment your public
is part of ('**COLLECTIVE** principle')

3. Realise that your audience has Choices (‘**COMPETITIVE** principle’)

A close-up photograph of a woman with blonde hair blowing in the wind, wearing a black top. She is holding a sandwich made with a bun and a dark, translucent filling, which is identified as a jellyfish sandwich. She is taking a bite out of it.

4. Go for a **POSITIVE CHANGE!**

JELLY-FISH SALAD
(*"Future Sea-food?"*)

Overfishing, a boring topic for discussion?

Try jelly-fish! Successful at several events including EurOcean 2010...

5. ... and be well-PREPARED

(also in terms of budget, feasibility, etc.)

Vlaams Instituut voor de Zee vzw
Flanders Marine Institute

6. Be Creative ('**CREATIVE** principle')

PLASTIC MONSTER
('Plastic Mer-trand')

6. Be creative ('**CREATIVE** principle')

... but don't complicate things
(e.g. '*Shrimp peeling*' activity in rest-homes)

7. Be ACTIVE & CO-CREATIVE
